## RECENT PROJECTS

### [EASY BLOG](#), *WRITING TOOL*

*My insanely fast/light personal blogging tool*

- Built to utilize my computer's webview via **Tauri** that compiles everything through a **Rust** backend producing a safe and secure app for any OS.
  - The **SlateJS** library is used as the text editor. Built on **React** it gives me unlimited control of every aspect of the editor experience.
  - Strapped to a **Supabase** database to hold all of the posts.
  - I wrote about my experience building this [here!](#)
- 

### [CREATE-ZP-CLI](#), *PRODUCTIVITY TOOL*

*Starting projects with one command.*

- Built in **JS** and hosted on **NPM** (`npx create-zp-cli`)
- This **CLI** tool spins up various templates based on input.
- Uses **NodeJS** for the main heavy lifting, pulling down and copying the template.
- Templates are individual repos making updating and maintenance simple.
